

## Permit to Import Quarantine Material

Permit:  Valid From:  Valid To:

Page 1 of 5

Importer	Exporter
Dr Jianbin Wang Monash University Wellington Road Monash University VIC 3800	Various Suppliers Exporters Various Addresses In All countries

**You are authorised to import the following material under the listed conditions**

*Note: This permit covers the Department of Agriculture quarantine requirement only.*

All imports may be subject to quarantine inspection on arrival to determine compliance with the listed permit conditions and freedom from contamination. Imports not in compliance or not appropriately identified or packaged and labelled in accordance with the import conditions they represent may be subject to seizure, treatment, re-export or destruction at the importer's expense.

Additionally, all foods imported into Australia must comply with the provisions of the *Imported Food Control Act 1992*, and may be inspected and/or analysed against the requirements of the Australia New Zealand Food Standards Code.

All imports containing or derived from Genetically Modified material must comply with the *Gene Technology Act 2000*.

It is the importer's responsibility to identify, and to ensure it has complied with, all requirements of any other regulatory organisations and advisory bodies prior to and after importation including The Australian Customs and Border Protection Service, The Department of Health and Ageing, Therapeutic Goods Administration, Australian Pesticides and Veterinary Medicines Authority, Department of Sustainability, Environment, Water, Population and Communities, Food Standards Australia New Zealand and any state agencies such as Departments of Agriculture and Health and Environmental Protection authorities. Importers should note that this list is not exhaustive.

This permit is granted for the purposes of the *Quarantine Act 1908* and *Quarantine Proclamation 1998* of the Commonwealth of Australia. The laws of Australian States and Territories may also impose restrictions on the import of animals, plants and other goods into those States and Territories. This import permit does not prevent the application of those State and Territory laws. The importer should seek its own advice on any restrictions that may apply in any State or Territory into which it is proposed to import the animals, plants or other goods to which this permit relates.

Import conditions are subject to change at the discretion of the Director of Quarantine. This permit may be revoked without notice.

Notification of the import must be provided to the Department of Agriculture for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under the *Customs Act 1901*. Notification must be consistent with *Quarantine Regulations 2000* (examples include a Quarantine Entry or a Quarantine declaration).

Commodity Name	Condition Number(s)	Country	End Use
<b>Drosophila spp. other than Drosophila suzukii</b>	PC6128 AND PCT1058 AND PC0600	All countries	Post-entry quarantine

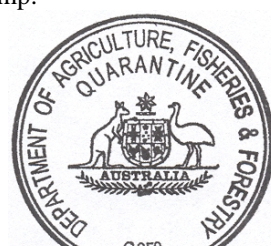

Condition	Condition Text
-----------	----------------

PC0600 Drosophila spp. that have been fully preserved in 70% or higher concentration of alcohol (ethanol, methanol, isopropyl alcohol or other aldehyde equivalents) can be released from quarantine and are no longer subject to the conditions of this permit.

Records of all processing/ preservation must be retained for audit purposes.

PC6128 This permit allows for the importation of *Drosophila* spp. other than *Drosophila suzukii* for

This permit is granted subject to the condition that fees determined under Section 86E are paid

### Importer's Responsibilities

1. All consignments must be accompanied by a copy of a valid Import Permit or the means to identify the Import Permit (i.e. permit number).
2. It is the importer's responsibility to contact the Department of the Environment to determine if a permit is required under the Environment, Protection and Biodiversity Conservation (EPBC) Act 1999.
3. *Drosophila* spp. must be packaged in new, insect-proof and crush-resistant containers that are sealed within a secure outer package.
4. All material (including insects and host plant material) must be free of mites and other insects, soil, prohibited seeds and other extraneous contamination of quarantine concern.
5. Airfreight or mail shipments should have all documentation (e.g. permit or permit number, invoice, manufacturer's declarations and certification where applicable) securely attached to the outside of the package and clearly marked 'Attention Quarantine'. Alternatively, necessary documentation will need to be presented at the time of clearance.
6. All consignments must be labelled LIVE INSECTS UNDER QUARANTINE and must clearly state the approximate number and species of insect within.
7. It is the importer's responsibility to ensure compliance with all international (e.g. IATA) and domestic requirements concerning the safe handling, transport and labelling of biological material.
8. A Quarantine Entry must be created for each consignment. If material arrives direct to the importer/QAP without a quarantine direction it is the Importer's responsibility to secure the material and contact their regional Department of Agriculture office.
9. The importer must confirm all arrangements with the regional office in the port of entry for the arrival inspections and any treatments.

### Quarantine Procedures

10. All imported material must be presented for inspection by a Quarantine Officer on arrival. The Quarantine officer receiving the shipment at the port of entry must:
  - a) check the documentation against the consignment; and
  - b) raise a quarantine entry (MAPS or AIMS) and place a copy on the outside of the parcel; and
  - c) verify the integrity of the package (assess for any signs of damage); and
  - d) contact the nominated person at the Quarantine Approved Premises to advise them of the arrival and whether the consignment can be on-forwarded;
  - e) If the consignment is suitable for on-forwarding, an order into quarantine with a movement direction to the QAP listed on the permit must be issued.

Note: Due to the presence of live insects, the Quarantine Officer should not open or remove any imported material from the containers/bags to prevent escape of any insects. If the Quarantine Officer believes the consignment of insects is not secure they should ensure the consignment is

	<p>securely sealed and refer it to a Department of Agriculture Entomologist for further advice.</p> <p>11. Following inspection, the consignment must be securely packaged to the satisfaction of the Quarantine Officer and forwarded directly to the Quarantine Approved Premises at:</p> <p><b>MONASH UNIVERSITY (#V1792)</b>  <b>Monash University, Building 17, Room 306</b>  <b>Wellington Road</b>  <b>CLAYTON</b>  <b>VIC</b>  <b>3800</b></p> <p>All imported insects and imported material must be held at the Quarantine Approved Premises and shall not be removed from these premises without prior approval.</p> <p>12. The consignment must be opened and maintained in the Quarantine Approved Premises within double insect proofing of sufficient mesh size to prevent loss of insects. The number and identity of insects received must be recorded on opening. All tests and transfers are to be done within this insect proofing.</p> <p>13. The insects are not to be used in field testing and must not be removed from the Quarantine Approved Premises.</p> <p>14. Before authority to release progeny can be given, the insects are to be bred through one generation in quarantine and to be tested and certified free of parasites, pests (e.g. mites) and pathogens by an entomologist acceptable to the Department of Agriculture. An “<u>Application to release <i>Drosophila</i> spp. from Quarantine</u>” form (Permit Certificate 1058) must forwarded to the Department of Agriculture entomologist. <b>Insects must not be removed from the QAP facility without written release from the Department of Agriculture.</b></p> <p>15. The Department of Agriculture must be contacted if any pests, pathogens, parasites or parasitoids are identified with the imported insects on arrival or if the imported specimens are NOT those listed on the import permit.</p> <p>16. The insectary must maintain detailed records of all imported consignments. These records must verify that the insects imported were those listed on the permit, approximate numbers of specimens per line/batch, indicate the health status of the insects (including details of inspections for parasites and disease), the research undertaken, any insect releases from the QAP and any issues identified with the insects while held under quarantine. These records may be subject to audit.</p> <p>17. All original packaging, containers and imported host material must be disposed of or treated by a Department of Agriculture approved method within 14 days of the material arriving at the QAP. Material must be subjected to one of the following treatments:</p> <ol style="list-style-type: none"> <li>a) Autoclaving at a gauge pressure of 105 kPa (15 psi), or 121°C, for 30 minutes.</li> <li>b) High temperature incineration.</li> <li>c) Irradiation at 25kGray (2.5 Mrad).</li> <li>d) Any other treatment approved by Plant Import Operations</li> </ol> <p>18. On or before permit expiry all insects not eligible for release, all residues, all derivatives and all materials (including host materials) that have been in contact with the imported material must be</p>

-----------	----------------

subjected to a quarantine approved treatment (as per point 17 above).

19. If the importer intends to continue to use the quarantine material after the expiry of the Import Permit, they must contact Plant Import Operations for approval.

20. Records relating to the storage and use of imported material must be maintained. These may be subject to audit.

Fax	

**Import Details**

Import Permit Number	
Quarantine Entry Number	
Date of arrival	
Address of facility where insects are held	
Quarantine Premises Number	
Number of insects for release	
<i>Drosophila</i> species	

I hereby apply for permission to release the *Drosophila* spp. described in this form. I fully understand and have complied with the conditions for release from quarantine outlined in the import permit conditions. I declare that only progeny of the imported *Drosophila* spp. will be removed from the facility.

The *Drosophila* described in the above table have been inspected and found free of parasites (eg. mites) and pathogens since importation. The stocks were examined under magnification and no evidence of pathogens was detected. No mites or other pests were present in any of the stocks.
